

# Public Policy Case Competition by EPS

**Harsh Verma | Pratyush Chauhan**

## POLITICS

- Policy gaps in NEP 2020 implementation.
- Government schemes under funded. (Samagra Siksha Abhivan)

P

## ECONOMY

- 20% drop out rate among low-income students. (UDISE + 2023)
- High cost of education, digital divide,

E

## SOCIETY

- Gender biases: Only 29% of STEM students are women (AICTE 2022).
- Discrimination against LGBTQ+ students.

S

# PESTEL ANALYSIS

Analysis Of Key barriers to Inclusivity

T

- 65% rural students lack digital access. (ASER 2022)
- Lack of assistive technology in schools.

TECHNOLOGY

E

- Rural school often lacks basic infrastructure like electricity and sanitation, further limiting inclusivity.

ENVIRONMENT

L

- RPWD act 2016 mandates accessibility, but 80% of schools lack inclusive infrastructure (NCERT 2023).

LAW

# Policy Recommendations – Accessibility & Disabilities

## Enable (Infrastructure)

Recommendations:

Mandatory universal accessibility in schools:

Ramps, braille textbooks, smart classrooms.

## Equip (Technology)

Recommendations:

Subsidized assistive tech: AI-based speech-to-text, screen readers, hearing aids for students

## Educate (Teacher Training)

Recommendations:

Train teachers in inclusive pedagogy & use of assistive technology.

## Enforce (Compliance and Training)

Recommendations:

Strict adherence to RPWD Act 2016 with penalties for non-compliance.

## Impact:

- Higher enrollment of students with disabilities in mainstream schools.
- Reduction in dropout rates due to accessible learning environments.
- Improved employability through skill-based education.

STAR IDEA

## Radically Inclusive:

- Establish specialized educational institutions designed for neurodiverse students (e.g., Autism, ADHD, Dyslexia) that offer tailored curriculums, small class sizes, and personalized teaching methods.
- Schools should provide flexible schedules, sensory-friendly environments, assistive technologies, and occupational therapy support to accommodate different learning styles.
- These institutions can also integrate students into mainstream education through hybrid models, allowing for progressive inclusion in regular schools.

# Policy Recommendations

## PPP Model (Public-Private Partnerships)

Affordability

Digital Inclusion

Gender Inclusivity

Community-Based Learnings

### Impact:

Increase in rural students' school retention by 25%.

Gender balance in STEM & higher education.

Bridging the digital divide through tech-enabled education.

# Socio-Economic & Gender Inclusivity

Scholarships & zero-interest loans for marginalized students (Govt. + CSR initiatives).

EdTech partnerships (e.g., BYJU's, Google) to provide free devices & internet in rural areas.

50% reservation for girls in STEM scholarships + nationwide gender sensitization programs.

Involve NGOs & corporates to provide mentorship for first-gen learners.

## STAR IDEA

### Virtual Reality (VR) Experiences to Foster Empathy & Inclusion

Introduce VR-based experiential learning to help students understand the challenges faced by marginalized groups (e.g., women in STEM, LGBTQ+ students, economically disadvantaged children).

Create VR simulations that allow students to experience biases first-hand (e.g., attending a classroom as a girl in a patriarchal society or experiencing difficulties faced by transgender students).

Partner with tech companies and NGOs to develop interactive educational modules promoting gender and socio-economic inclusivity.

# Policy Recommendations – Mental Health & Underrepresented Communities

## STAR IDEA

- Establish AI-powered digital mental health platforms where students can access counseling, self-help resources, stress management tools, and peer support networks anytime.

### The platform should provide:

- AI chatbots for immediate psychological support.
- Anonymous peer support communities to encourage students to seek help.
- Emergency intervention features connecting students to mental health professionals when needed.
- Mindfulness and stress management exercises integrated into daily

### Impact:

More culturally diverse & accepting education systems.

Lower stress-related dropouts & reduced suicide rates.

Mainstreaming of marginalized communities in higher education.

## Framework: Holistic Well-Being Model (Prevent, Support, Integrate)

Prevent (Early Intervention)

Group A  
Group B  
Group C

- Mental health curriculum integrated into school syllabi to promote emotional resilience.

Support (Counseling)

- 1 counselor per 250 students' policy with dedicated mental health funding.

Integrate (Representation)

- Diverse curriculum: Tribal history, LGBTQ+ inclusivity in textbooks.

Inclusive Governance

- Student diversity councils in schools & universities for real-time policy feedback.
